### **CPGG In-Field Operations/HD Drone Scouting Manager**

This position is for someone who is experienced with or willing to learn how to manage the day-to-day HD drone scouting programs and Champaign Premium Grain Growers (CPGG) in-field applications. The core need for this position is to manage daily workflows for drone pilots and applicators custom applying fertilizers. This position also requires a basic understanding of agronomy and a passion for customer care. In this position you will use precision ag technology to its fullest.

Integrated Ag Services is a crop consulting firm providing diverse agronomic services to crop farmers in central Ohio and beyond. Champaign Premium Grain Growers is a privately owned input supplier managed by IAS. For more information about Integrated Ag Services go to our website: [www.integratedag.net](http://www.integratedag.net)

Job responsibilities include:

- Schedule and direct the in-field drone scouting team May to August, and fertilizer applications in the spring and fall
- Scheduling direct shipment of products (logistics) from the terminal to the farm and field
- Train pilots to operate the drones safely and efficiently for scouting
- Train applicators to operate the application equipment safely and efficiently
- Assist in the management of product inventory and supplies at our fertilizer facility
- Oversee regular maintenance of our fertilizer facility
- Monitor in-field efficiency and accuracy
- Understand and use the technology and data management tools used at IAS
- Can critically evaluate decisions, problem solve, and prioritize work
- Organize daily action plans and communicate those plans to staff and customers

Annual Salary: **>\$50,000 plus bonuses**. Starting pay will depend on experience. There are many other benefits, paid vacation, personal time, retirement plan, health insurance, disability, and more.

**This position requires approximately 4-8 Saturdays/year. During the busy times you will work more than the normal 40 hours per week.**

### **Required Skills for Position:**

- Minimum two (2) year degree is preferred, but experience in operations management is acceptable. Some experience in the agriculture field is preferred.
- Mechanical skill set
- Enjoy managing and working with people in the agricultural community
- General interest in agronomy and general crop production
- Attention to detail and organization
- Must have a valid driver's license with no major traffic violations
- Have, or willing to obtain a CDL license
- Willing to work the additional seasonal hours as required
